A LEANY FEMALE ACADEMY.—The next A quarter will commence on the first Monday of perturber. This institution (founded in the year list, and occupying a spacious and elegant edit, exceted especially for its accommodation,) commercial according to the charge and teachers, besides four who are charge of the ornamental branches, and subset to monthly visitations by committees of the

emches of a complete female education.
The institution is furnished with maps, charts, felses, models, chemical and philosophical apparatics an ordery, with numerous working models and harans for illustrating the science of astronomy, octivating an apparatus for this purpose not sursated, it is believed, by that of any similar institution in the country; and an extensive library, consing about six thousand volumes; in addition to like, in each of the three lower departments is a mill library, carefully selected with reference to **Capacities* and attainments* of the younger puts.

one important feature in the arrangement of the ademy, is the division of labor among many intuctors, so that the attention of each is devoted to few studies, instead of being occupied with the hole belonging to a department; and it is to this at the trustees ascribe, in a great measure, exputation which the institution has derived my the superior scholarship of its pupils.

The department of composition continues, as herefore, to receive particular attention, and, in addimate triticisms and corrections of individual promises, oral lectures are given, by the principal

and professor of the first department, to the various classes consented for that purpose.

The cervices of a teacher are devoted exclusively bustnetions in penmanship; and instruction in toos music is given by a lady eminently qualified, and who is engaged in this branch alone.

The French department, it is believed, is not epabled in its arrangements and facilities by any other in the country. The pupils receive daily lessas, and, by the aid of the normal class, in which youg ladies may qualify themselves to become acceptional to the language, the juvenile finantment has succeeded beyond the expectations of between the same age in France, the pupils in this featurent has succeeded beyond the expectations of between the acquire the language in its purest permentation, with astonishing ease and accuracy, lathe department of drawing and painting, the bases have secured the services of a very accomplised instructor in this art.

The courses of lectures on astronomy and chemistry are delivered during the autumn and winter stars, those on the other branches of natural same, during the spring and summer terms.

The boarding establishment, under the personal clares of the principal and professor MoLINARD, and adject to the visitation of the trustees—in both of which are afforded the best advantages for the acquirement of a practical knowledge of instrumental music, as and in the latter of which the French language acclusively spoken—the trustees commend with part confidence to their patrons.

The academic year commences on the 1st of Sepance, and is divided into four terms, commencing inspectively on the 1st September, 17th November, in February, and 4th May; a vacation of six works following the examination in July, and a second of one week at the close of the quarter ending maching, inspire the atmost confidence that the internal of the practical confidence to the internal of the academy will be constantly advanced, and the latter of which the french and the internal of pupils bleasing.

GREATEST WONDER OF THE AGE.

PATENT GALVANIC RING, AND MAGNETIC FLUID.—These wonderful Rings, and the Galvanic Fluid, have created a great sensation throughout Europe, and are attracting crowds to see them, both in New York and Boston. They care with astonishing rapidity rheumatism, gout, tic-doloreux, fits, cramp, sick headache, indigestion, paralysis, stiff joints, general debility, deficiency of nervous energy, and all nervous disorders. They produce all the beneficial results of the ordinary galvanic battery, or electric and magnetic machines, without the injurious shocks which always accompany their application. The secret of preparing the Ring was discovered by Professor Harmance Christie, of London, in October last, and they have been recently introduced into this country by Dr. A. Christie, who warns the American public, from the beginning, to beware of spurious minitations. To guard against fraud, he will appoint but one agency

\$100 REWARD.—Ranaway from the subscriber, on the night of the 13th inst., a mulatto boy, named WILLIAM, alias William Savage Shackelford. Said boy is about 17 years old, bright complexion, sandy colored curly hair, hazel eyes, flat nose, square built, about 5 feet 4 or 5 inches high. He has no beard, and is remarkably intelligent; speaks very correctly, and has quite a pleasing address. He can read and write with facility, and, no doubt, has a free pass. He had on when he went away a gray cloth roundabout, cloth cap, light colored cassimere pantaloons with the straps cut off, and boots. He was raised in Virginia, by the late Beverly Heath, esq.; and, as I have reason to believe he has a considerable sum of money, he may attempt to make his way to a free State. I will give the above reward for him, and sufficient proof to convict any white person in aiding him to escape; or twenty dollars for the boy alone, if confined in any jail so that I can get him.
